

TRACY GRAY

Ph.D., a Managing Research Scientist at the American Institutes for Research, directs the National Center for Technology Innovation (www.NationalTechCenter.org) and the Center for Implementing Technology in Education (www.CITEd.org). These projects promote the development and integration of innovative technologies in schools throughout the nation to ensure that all students have access to quality education. She also serves as the Director for the Microsoft Math Partnership, focusing on the implementation of high quality math and science programs for middle school students. Dr. Gray is a nationally recognized expert in education and technology who has led numerous projects in the United States and abroad that examine the impact of technology on educational achievement. She has published and lectured widely on issues related to the integration of emerging technologies into the classroom, particularly those with special needs. Prior to joining AIR, she led the philanthropic initiatives as the Vice President for Youth Services at the Morino Institute. Prior to that work, she served as the Deputy Executive Director and Chief Operating Officer for the Corporation for National Service. As part of the leadership team, she guided the launch of AmeriCorps to enable more than 50,000 young people to serve in over 1000 programs throughout the United States. Earlier, Dr. Gray served as the Deputy Director for the first American Red Cross AIDS Public Education program. In 2008, she served as a judge for the International Imagine Cup, sponsored by Microsoft that brings together more than 1000 students from around the world to compete on technology-related projects.
